This work focuses on the Acadian vernacular - transmitted orally to the present day - of the French speakers of the Port-au-Port peninsula in the extreme west of the island of Newfoundland in Canada. The result is a differential dictionary based on a corpus of field studies dating mostly from the early 1990s and amassing responses from 56 native informants, all

of them bilingual (French/English). It comprises 2240 main entries and about 5400 examples of usage. Each article is followed by remarks of a comparative and historical nature. [The History of Louisiana](#)

A deeply personal account of Congresswoman Gabrielle Giffords' and astronaut Mark Kelly's lives together, recounting their courtship, Ms Giffords' rise in politics, and the tragic 8th January 2011 shooting in Arizona which killed six people

and gravely wounded Representative Gifford and twelve others. The book also tells the story of her recovery progress and traces Kelly's career from decorated Desert Storm combat pilot to his recent mission as the commander of Space Shuttle Endeavour's final flight.

 The New Orleans mayor who removed the Confederate statues confronts the racism that shapes us and argues for white America to reckon with its past. A passionate, personal, urgent book from the man who sparked a national debate. "There is a difference between remembrance of history and reverence for it." When Mitch Landrieu addressed the people of

New Orleans in May 2017 about his decision to take down four Confederate monuments, including the statue of Robert E. Lee, he struck a nerve nationally, and his speech has now been heard or seen by millions across the country. In his first book, Mayor Landrieu discusses his personal journey on race as well as the path he took to making the decision to remove the monuments, tackles the broader history of slavery, race and institutional inequities that still bedevil America,

and traces his personal relationship to this history. His father, as state legislator and mayor, was a huge force in the integration of New Orleans in the 1960s and 1970s. Landrieu grew up with a progressive education in one of the nation's most racially divided cities, but even he had to relearn Southern history as it really happened. Equal parts unblinking memoir, history, and prescription for finally confronting America's most painful legacy, *In the Shadow of*

Statues contributes strongly to the national conversation about race in the age of Donald Trump, at a time when racism is resurgent with seemingly tacit approval from the highest levels of government and when too many Americans have a misplaced nostalgia for a time and place that never existed.

In this book the author goes inside the Coca-Cola Company to examine one of the most fascinating episodes in the history of American business.

Traces the history of an American institution that began in 1885 with the backyard brew of druggist John Pemberton. But it was when Robert Woodruff, with his old-fashioned values and homespun philosophy, took over the company that Coke became a household word.

Studies the adoption of a new civic identity in fourteenth-century Rome from the perspective of a young revolutionary, Cola di Rienzo

The Real Coke, the Real Story Penguin

From the moment he set foot on it, Karl Rove has rocked America's political stage. He ran the national College Republicans at twenty-two, and turned a Texas dominated by Democrats into a bastion for Republicans. He

launched George W. Bush to national renown by unseating a popular Democratic governor, and then orchestrated a GOP White House win at a time when voters had little reason to throw out the incumbent party. For engineering victory after unlikely victory, Rove became known as “the Architect.” Because of his success, Rove has been attacked his entire career, accused of everything from campaign chicanery to ideological divisiveness. In this frank memoir, Rove responds to

critics, passionately articulates his political philosophy, and defends the choices he made on the campaign trail and in the White House. He addresses controversies head-on— from his role in the contest between Bush and Senator John McCain in South Carolina to the charges that Bush misled the nation on Iraq. In the course of putting the record straight, Rove takes on Democratic leaders who acted cynically or deviously behind closed doors, and even Republicans who

lacked backbone at crucial moments. *Courage and Consequence* is also the first intimate account from the highest level at the White House of one of the most headline-making presidencies of the modern age. Rove takes readers behind the scenes of the bitterly contested 2000 presidential contest, of tense moments aboard Air Force One on 9/11, of the decision to go to war in Afghanistan and Iraq, of the hard-won 2004 reelection fight, and even of his painful three years fending off an indictment

by Special Prosecutor Patrick Fitzgerald. In the process, he spells out what it takes to win elections and how to govern successfully once a candidate has won. Rove is candid about his mistakes in the West Wing and in his campaigns, and talks frankly about the heartbreak of his early family years. But *Courage and Consequence* is ultimately about the joy of a life committed to the conservative cause, a life spent in political combat and service to country, no

matter the costs.

While the crisis in Central America is receiving attention from scholars in a variety of disciplines, few works have focused on the role of nongovernment organizations in reducing levels of violence in that region. This remarkable case study examines the resilient struggle by workers at the Guatemala Coca-Cola bottling plant from 1976-1986, and documents why this union was able to survive within a repressed government to become a key factor in stimulating a larger

independent labor movement in the country. Scholars of political sociology, labor studies, and the governments and politics of Central America will do well to read this volume.
