MORROW COMPTON

Lullabies, Lyrics and Gallows Songs

World Scientific

"The book provides an excellent combination of broad theoretical background with a generous helping of vocational guidance on the practice of health promotion." scotregen "A very welcome addition to the practical side of health promotion! Laverack's brief and simply-worded text weaves together just the right balance of theory, evidence, tips and case studies to satisfy the new learner looking to gain a grasp of health promotion's empowering whole, while still offering new insights to the more seasoned practitioner." Ronald LabontÃ©, Institute of Population Health, University of Ottawa How can health promotion practitioners help communities to become more empowered? How do you encourage different communities to work together towards a shared goal? How can you focus your resources to be most effective in building empowered communities? How do you evaluate your success (and failures) in building empowered communities? Power and empowerment are two complex concepts that are central to health promotion practice. People experience empowerment in many different ways and this book explains an approach that has been used by health promoters to intentionally build and evaluate empowerment. The book provides a special focus on communities and is illustrated throughout with useful field experiences in the United Kingdom, Asia,

North America, the Pacific region and Africa. The book aims to provide the reader with: An understanding of the key concepts of power and empowerment and the link to improved health outcomes in the context of health promotion programmes An understanding of practical approaches that can be used in health promotion programming to build and evaluate empowered communities Case study examples of how communities can be empowered in practice This unique book offers sound theoretical principles to underpin the practical approaches used to build empowered communities and brings together new and innovative approaches in health promotion practice. Health Promotion Practice is essential reading for health promotion students and practitioners who want to learn more about innovative approaches to build empowered communities in their everyday work. It will inspire them to work in more empowering ways in health promotion practice and to carefully contemplate how they can influence the way others gain power.

Thinking Without a Banister John Wiley & Sons

Life on the Screen is a book not about computers, but about people and how computers are causing us to reevaluate our identities in the age of the Internet. We are using life on the screen to engage in new ways of thinking about evolution, relationships, politics, sex, and the self. Life on the Screen traces a set of boundary negotiations, telling the story of the changing impact of the computer on our psychological lives and our evolving ideas about minds, bodies, and machines. What is emerging, Turkle says, is a new sense of identity—as

decentered and multiple. She describes trends in computer design, in artificial intelligence, and in people's experiences of virtual environments that confirm a dramatic shift in our notions of self, other, machine, and world. The computer emerges as an object that brings postmodernism down to earth.

Introduction to German Tax Law

Cambridge University Press

Independent administrative authorities have become a permanent feature of the institutional landscape over past decades. The need for institutions with both impartiality and technical expertise has led to an increase in number and scope of independent administrative authorities. Independent administrative authorities regulate stock markets and financial institutions; they protect fundamental rights such as access to administrative documents. There is however a conflict between independence and accountability. In some ways, independent administrative authorities are at odds with the traditional notion of separation of powers which still lies at the heart of constitutional thinking. This book aims to shed light on how different legal jurisdictions have articulated their answers to this tension, at the same time discussing how separation of power has been twisted or reworked to make room for this novel form of public authority.

The defining attributes of the 21st-century economy and fourth industrial revolution are innovation, technology, globalization, and a rapid pace of change. Therefore, an organization's capacity to enhance the capabilities of its workforce and create a culture of continuous learning are vital to remaining competitive. These trends make an effective learning-and-development (L&D) function more critical than ever. This compendium of articles, from L&D professionals at McKinsey & Company, discusses every facet of professional development and training-from ensuring that L&D's efforts are closely aligned with business strategy to elements of advancing the L&D function, designing learning solutions, deploying digital learning, executing flawlessly, measuring impact, and ensuring good governance. For L&D professionals seeking to hone their organization's efforts, Elevating Learning & Development: Insights and Practical Guidance from the Field is the ideal resource.

Explores the latest historical research on

the development of the earth's climate, showing how even minor changes in the climate could result in major social, political, and religious upheavals.

Agile Recruiting Peter Lang Pub Incorporated

Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself a philosopher, though she studied and maintained close relationships with two great philosophers—Karl Jaspers and Martin Heidegger—throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human Condition*, in 1961 *Between Past and Future*, in 1963 *On Revolution and Eichmann in Jerusalem*, in 1968 *Men in Dark Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials,

taken together, manifest the relentless activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood. (Edited and with an introduction by Jerome Kohn)

Problem Solving Models of Scientific Discovery Learning Processes W. W. Norton & Company

New York Times Bestseller Winner of a Goodreads Choice Award "Funny, dark, and at times stunningly existential." —Marianne Eloise, *Guardian* Everyone has questions about death. In *Will My Cat Eat My Eyeballs?*, best-selling author and mortician Caitlin Doughty answers the most intriguing questions she's ever received about what happens to our bodies when we die. In a brisk, informative, and morbidly funny style, Doughty explores everything from ancient Egyptian death rituals and the science of skeletons to flesh-eating insects and the proper depth at which to bury your pet if you want Fluffy to become a mummy. Now featuring an interview with a clinical expert on discussing these issues with young people—the source of some of our most revealing questions about death—*Will My Cat Eat My Eyeballs?* confronts our common fear of dying with candid, honest, and hilarious facts about what awaits the body we leave behind.

Health Promotion Practice: Building Empowered Communities John Wiley & Sons

Generation and testing of hypotheses are central aspects of the process of scientific discovery. In instructional contexts, students can acquire a basic understanding of these concepts by means of scientific discovery learning. In order to study the mechanisms that underly students' ability to generalize

from specific observations and to use these hypotheses to derive predictions, observations on students working in a computerized discovery learning environment for geometrical optics are analyzed. In addition, cognitive simulation programs taking the form of production systems are developed to capture the central aspects of students' discovery learning strategies. These task-specific models are discussed within the framework of general computational theories of human inductive learning.

Narcissism and Power Edward Elgar Publishing

This is the only current and in print book covering the full field of transit systems and technology. Beginning with a history of transit and its role in urban development, the book proceeds to define relevant terms and concepts, and then present detailed coverage of all urban transit modes and the most efficient system designs for each. Including coverage of such integral subjects as travel time, vehicle propulsion, system integration, fully supported with equations and analytical methods, this book is the primary resource for students of transit as well as those professionals who design and operate these key pieces of urban infrastructure.

Global Health Diplomacy OECD Publishing

The research presented in this book based on new primary data demonstrates that in terms of civil society actors adapting to the European political space the Europeanization process has an uneven development. This innovative book integrates top-down approaches for the study of relationships within the developing EU-multilevel system (i.e., the consequences of Europeanization for

civil society at the local level) and bottom-up approaches (i.e., the consequences of civil society for the process of European integration and democracy in the EU). The contributors argue that exploration of these recursive linkages requires a rethinking of the relationships between (local, national, and trans-national) civil society on the one hand, and multi-level governance on the other. In analyzing the opportunities for civil society associations to contribute to European integration and decision-making from various perspectives, the following findings are presented, amongst others: engagement with and confidence in the EU (compared to national institutions) is relatively weak among associational members party elites play a key gatekeeper role in the European space the EU and interest groups have had limited success in stimulating the development of citizen engagement, civil society and social capital in various countries. In the rapidly expanding field of research on democratic decision-making in Europe, this book will be welcomed by academics and scholars alike at postgraduate levels and above. Experts working in the field of European decision-making (such as lawyers and lobbyists) who are looking for conclusions based on high-quality empirical research will also find much in this book to engage them.

Autonomous Systems and the Law Springer

A classic in its field, this charming work by a noted scholar explores traditional Irish customs and activities—from thatching a roof, churning butter, cultivating and harvesting crops, making pots and pans and building furniture to behavior at weddings, wakes, festivals, and funerals. "For all its learning, the book is popular in the best way, and

admirably illustrated. . . ."—Times Literary Supplement. (London)

Drawing on a wide range of data sources, this book constructs and analyses different indicators of child well-being across the OECD covering six key areas: material well-being; housing and environment; education; health and safety; risk behaviours; and quality of school life.

The Future of Feminism Haufe-Lexware

Ralf Friedrich developed an academically validated and process-oriented maturity model with emphasis on special needs of virtual teams. He provides criteria and indicators of performance for virtual teams and combines different approaches of maturity models into an overall framework to measure and develop virtual team performance. This book describes the development and validation of the Virtual Team Maturity Model (VTMM®) consisting of 11 processes for virtual team collaboration, defined by inputs, methods, outputs and Key Performance Indicators (KPIs) assigned to four maturity levels. The model supports an algorithm for calculating the maturity level of the team based on a set of questionnaires.

Die Stiftung John Wiley & Sons

To promote behavioural change and improve decision making, we must work with the subconscious. Inclusion Nudges target the advantages and shortcomings of our unconscious mind and decision-making processes in order to obtain the desired and needed changes. In this Guidebook, the concept and the three types of Inclusion Nudges are fully explained and illustrated with over 70 practical interventions to promote behaviour, culture, and systems change to mitigate unconscious bias and create more inclusive organisations. The Inclusion Nudges Guidebook is for those who...* Struggle with getting a change to 'stick'.* Want to improve decision making and performance.* Are challenged with translating an ideal goal into behaviors to achieve that goal.* Find it hard to understand what motivates people to make decisions.* Want to get more people engaged in their work. Everyone can learn to design Inclusion Nudges. We believe that if all internal agents of organisational change master

these techniques, our actions and behaviours will better leverage the full potential of all people, thereby producing more successful organisations. For this innovative concept and work, the authors, Lisa Kepinski & Tinna C. Nielsen, have been named to The Economist's Global Diversity List as "Top 10 Diversity Consultants" in November 2015.

OSCE Yearbook 2019 McGraw-Hill Education (UK)

This report sets out recommendations for domestic rules to neutralise the effect of hybrid mismatch arrangements and includes changes to the OECD Model Tax Convention to address such arrangements. Once translated into domestic law, the recommendations in Part 1 of the report will neutralise the effect of cross-border hybrid mismatch arrangements that produce multiple deductions for a single expense or a deduction in one jurisdiction with no corresponding taxation in the other jurisdiction. Part 1 of the report will be supplemented by a commentary, which will explain the recommended rules and illustrate their application with practical examples. Part 2 of the report sets out proposed changes to the Model Convention that will ensure the benefits of tax treaties are only granted to hybrid entities (including dual resident entities) in appropriate cases. Part 2 also considers the interaction between the OECD Model Convention and the domestic law recommendations in Part 1.

A Cultural History of Climate Walter de Gruyter

Civil Society and Governance in Europe
Haufe-Lexware

This compilation of 22 firm-specific case studies is an important contribution to the discussion of 'servicification' trends in manufacturing. 'Services have increased in importance and value in many manufacturing value chains, making companies that produce physical products look more like service enterprises. What services do global value chains use in their operations, how important are they and how do economic policies shape firms' configurations, operations, and location of global value chains? This book addresses these questions and more. The interviewed firms, based in 12 APEC economies, come from different sectors ranging from multinational automotive, construction equipment, and electrical appliance manufacturers to small and medium manufacturers of watches or chemical for water treatment. The book analyses what specific services are important in different stages of the value chain, and whether they are typically provided in-house or outsourced.

Contents: Manufacturing-Related Services (Patrick Low and Gloria O Pasadilla) Manufacturing of Aircraft Control Systems in the Philippines (Andre Wirjo and Gloria O Pasadilla) Industrial Welding Services in Thailand (William Haines) Manufacturing of Mining and Construction Equipment (David Sit and Patrick Low) Manufacturing of Computer Servers (Yuhua Zhang) Wastewater Treatment Services (Arian Hassani and Andre Wirjo) Manufacturing of Automotive Components in the ASEAN Region (Denise Cheung) Manufacturing of Oil and Gas Industry Equipment in Singapore (Andre Wirjo and Gloria O Pasadilla) Car Manufacturing in the Philippines (Sherry

Stephenson) Manufacturing of Thermal Power Generation Equipment (Gloria O Pasadilla) Production of Precision Die and Machine Parts in Thailand (Denise Cheung and Andre Wirjo) Manufacturing of Refrigerators (David Sit) Watch Manufacturing (Deborah Elms) Manufacturing of Automotive Components in Mexico: Perspectives from Three Firms (Andre Wirjo, Gloria O Pasadilla and Joel G Bassig) Manufacturing of Telecommunications Equipment (Huani Zhu and Gloria O Pasadilla) Manufacturing of Printed Circuit Boards in Canada (Ben

Shepherd) Wine Industry in Chile (Karina Fernandez-Stark and Penny Bamber) Integrated Logistics Solutions Provider in Mexico (Andre Wirjo and Gloria O Pasadilla) Remanufacturing Services in the Construction Machinery Value Chain (Katherine Tait and Gary Gereffi) Manufacturing of Consumer Electronic Appliances in Indonesia (Emmanuel A San Andres) Fresh Cherry Industry in Chile (Penny Bamber and Karina Fernandez-Stark) Readership: Researchers, students and academics who are interested in international trade; trade economists; policymakers and general public who are interested in manufacturing related topics.
