 Bernd Heine argues that the structure of grammatical categories is predictable to a large extent once we know the range of possible cognitive structures from which they are derived. The author uses as his example the structure of predicative possession, and shows how most of the possessive constructions to be found in the world's languages can be traced back to a small set of basic conceptual patterns. Using grammaticalization theory Heine describes how each affects the word order and morphosyntax of the resulting possessive construction.

 "Explores the historical rise of the literary fairy tale as genre in the late seventeenth century. In his examinations of key classical fairy tales, Zipes traces their unique metamorphoses in history with stunning discoveries that reveal their ideological relationship to domination and oppression. Tales such as Beauty and the Beast, Snow White and the Seven Dwarves, and Rumpelstiltskin have become part of our everyday culture and shapers of our identities. In this lively work, Jack Zipes explores the historical rise of the literary fairy tale as genre in the late seventeenth century and examines the ideological relationship of classic fairy tales to domination and oppression in Western society. The fairy tale received its most "mythic" articulation in America. Consequently, Zipes sees Walt Disney's Snow White as an expression of American male individualism, film and literary interpretations of L. Frank Baum's The Wizard of Oz as critiques of American myths, and Robert Bly's Iron John as a misunderstanding of folklore and traditional fairy tales. This book will change forever the way we look at the fairy tales of our youth.

Nothing's new Everything's old. I'm exactly the same as ever Only more lazy More aimless More curmudgeonly...! One of the high points of world drama, Chekhov's bittersweet tale of frustrated lives and unrequited loves - by turns witty, playful, nostalgic and tragic - is captured in all its complexity by Bryony Lavery's spirited, sharply-written adaptation, first produced at Birmingham Rep in 2007.

A seminal text in literary theory available in English for the first time Legend, saga, myth, riddle, saying, case, memorable, fairy tale, joke: André Jolles understands each of these nine "simple forms" as the reflection in language of a distinct mode of human engagement with the world and thus as a basic structuring principle of literary narrative. Published in German in 1929 and long recognized as a classic of genre theory, Simple Forms is the first English translation of a significant precursor to structuralist and narratological approaches to literature. Like Vladimir Propp's Morphology of the Folktale, with which it is often compared, Jolles's work is not only foundational for the later development of genre theory but is of continuing relevance today. A major influence on literary genre studies since its publication, Simple Forms is finally available in English.

When did fairy tales begin? What qualifies as a fairy tale? Is a true fairy tale oral or literary? Or is a fairy tale determined not by style but by content? To answer these and other questions, Jan M. Ziolkowski not only provides a comprehensive overview of the theoretical debates about fairy tale origins but includes an extensive discussion of the relationship of the fairy tale to both

the written and oral sources. Ziolkowski offers interpretations of a sampling of the tales in order to sketch the complex connections that existed in the Middle Ages between oral folktales and their written equivalents, the variety of uses to which the writers applied the stories, and the diverse relationships between the medieval texts and the expressions of the same tales in the "classic" fairy tale collections of the nineteenth century. In so doing, Ziolkowski explores stories that survive in both versions associated with, on the one hand, such standards of the nineteenth-century fairy tale as the Brothers Grimm, Hans Christian Andersen, and Carlo Collodi and, on the other, medieval Latin, demonstrating that the literary fairy tale owes a great debt to the Latin literature of the medieval period. Jan M. Ziolkowski is the Arthur Kingsley Porter Professor of Medieval Latin at Harvard University.

The book is famous for its depiction of life around the time of the division of Macedonia, its characterizations, and its use of language and historical setting. Set in Macedonia immediately after World War 2, it tells the story of a group of children orphaned by the war and their life in an orphanage. Full of characters and incidents, the book presents a child's view of life that is both humorous and bleak and, by its end, very moving. At a metaphoric level, the novel presents a strong critique of the authoritarianism of both institutional life and the Communist system, and their inability to reconcile with the needs and nature of the individual. At the human level, *The Big Water* is a very positive and moving story of the emotional development of children, and of the fundamental and irreplaceable role of the mother. Readers will remember this story and its climax long after they have finished the book.

In 'The Death of a Civil Servant', an administrative clerk accidentally sneezes on a hierarchical superior at the opera, which results in great embarrassment and hilarious and futile attempts at atonement. The other short stories included in this volume, 'A Calculated Marriage', 'The Culprit', 'The Exclamation Mark', 'The Speech-Maker', 'Who Is to Blame?' and 'A Defenceless Creature' are in the same absurdly comical vein. This short collection shows Chekhov in an amusing, playful light, poking fun at the greed, sycophancy and ignorance of his characters, with the moral detachment that also characterizes his major, serious works.
