Includes tear out formulas and tables section between pages 76 and 77.

Modern Elementary Statistics Addison-Wesley Longman
Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra,

and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. Coverage and Scope Chapter 1 Sampling and Data Chapter 2 Descriptive Statistics

MyLab Statistics With Pearson Etext -- 24 Month Standalone Access Card -- for Elementary Statistics Using the Ti-83/84 Plus Calculator Pearson College Division

The STATDISK(R) Manual is organized to follow the sequence of topics in the text, and contains an easy-to-follow, step-by-step guide on how to use STATDISK(R) to perform statistical processes.

Elementary Statistics Technology Update Addison-Wesley Statistics With Technology, Second Edition, is an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation of data is more important than how to compute basic statistical values.
