This book, by W. Dorr Legg, founder of ONE Institute, with the help of other longtime ONE leaders David Cameron and Walter L. Williams, gives a thorough look at this pioneering gay rights group that began in Los Angeles in 1952. ONE started by publishing America's first homosexual magazine, and then branched out into offering America's first classes in what is now called Gay and Lesbian Studies, and published ONE Institute Quarterly of Homophile Studies (America's first academic journal in Gay and Lesbian Studies). In 1954 ONE sued the U.S. Post Office for refusing to distribute ONE magazine through the mails, which in 1958 resulted in the first U.S. Supreme Court ruling in favor of gay rights.

Architecture of Brazil: 1900-1990 examines the processes that underpin modern Brazilian architecture under various influences and characterizes different understandings of modernity, evident in the chapter topics of this book. Accordingly, the author does not give overall preference to particular architects nor works, with the exception of a few specific works and architects, including Warchavchik, Niemeyer, Lucio Costa, and Vilanova Artigas.

Henry Dunster and His Descendants Alpha Edition

Through the braided narratives of three spirited characters, this novel bears witness to the infamous crime that metastasized uber-civilized Montreal, the "Montreal Massacre," when on December 6, 1989, fourteen female engineering students were murdered in their classrooms. The novel focuses on the lives of

Deirdre, a first-year female engineering student at Aquitaine, who takes a Women's Studies course as an elective and Marin, a student at Cantech who ponders what it means to be a female engineering student in such a chilly gendered climate. Everyone wants Marin at her party. Bohemian and beautiful, she is as passionate about constructing sets for theater and opera as she is about Trey, the one man she can finally trust. Deirdre is earnest and perceptive, but too naïve to know that frat boys can be dangerous, and she is drugged and raped at a party in an infamous men's residence. Jenean, a francophone female journalist working in both languages, is feisty and urbane, a feminist who longs for peace between the sexes even as she ponders splitting from her live-in partner. She finds herself on the killer's list of 19 women he would have liked to kill. Set in that tragic historic moment, on two college campuses fraught with gendered antagonisms, this novel tells the story of the victims, following the imagined lives of these women as they happen headlong into the December 6 tragedy -- a story disarmingly accurate that explores the profundity of deepest love and unimaginable loss. It follows them through a semester of college, from the crisp autumnal beginnings to that tragic winter. It does not end there. It then takes up with the families and survivors, examining the enduring effects of the massacre's 24 minutes of inarticulate inhumanity.

Nothing slips by Brecken Hancock's deft ear as she seductively plumbs the depths of the evolution of bathing, doppelgangers, the Kraken, and the minutiae of family with all its tragic misgivings. The poems in *Broom Broom* pervert the rational, safe parts of the world to extoll and absorb the sweep of human history. What I mean to say is, the evidence is always there. From where we stand, we confuse lampposts for ghosts. Brecken Hancock's poetry, essays, interviews, and reviews have appeared in several journals, including *Event* and *Fiddlehead*. She is reviews editor for

Arc Poetry Magazine.

The Physics Teacher Education Coalition (PhysTEC) is proud to bring together the first published collection of full-length peer-reviewed research papers on teacher education in physics. We hope that this work will help institutions consider ways to improve their education of physics and physical science teachers, and that research in this field can continue to grow and challenge or support the effectiveness of practices in K-12 teacher education.

A History of Long Island Alpha Edition

As requested by the National Science Foundation (NSF) and the Interagency Committee for Extramural Mathematics Programs (ICEMAP), this report updates the 1984 Report known as the "David Report." Specifically, the charge directed the committee to (1) update that report, describing the infrastructure and support for U.S. mathematical sciences research; (2) assess trends and progress over the intervening five years against the recommendations of the 1984 Report; (3) briefly assess the field scientifically and identify significant opportunities for research, including cross-disciplinary collaboration; and (4) make appropriate recommendations designed to ensure that U.S. mathematical sciences research will meet national needs in coming years. Of the several components of the mathematical sciences community requiring action, its wellspring--university research departments--is the primary focus of this report. The progress and promise of research--described in the 1984 Report relative to theoretical development, new applications, and the refining and deepening of old applications--have if anything increased since 1984, making mathematics research ever more valuable to other sciences and technology. Although some progress has been made since 1984 in the support for mathematical sciences research, the goals set in the 1984 Report

have not been achieved. Practically all of the increase in funding has gone into building the infrastructure, which had deteriorated badly by 1984. While graduate and postdoctoral research, computer facilities, and new institutes have benefited from increased resources, some of these areas are still undersupported by the standards of other sciences. And in the area of research support for individual investigators, almost no progress has been made. A critical shortage of qualified mathematical sciences researchers still looms, held at bay for the moment by a large influx of foreign researchers, an uncertain solution in the longer term. While government has responded substantially to the 1984 Report's recommendations, particularly in the support of infrastructure, the universities generally have not, so that the academic foundations of the mathematical sciences research enterprise are as shaky now as in 1984. The greatest progress has been made in the mathematics sciences community, whose members have shown a growing awareness of the problems confronting their discipline and increased interest in dealing with the problems, particularly in regard to communication with the public and government agencies and involvement in education. "Performance is better than promise" has long been the motto of Ernest F. "Fritz" Hollings, a former Governor of South Carolina and six-term U.S. Senator who has distinguished himself as a stalwart advocate of fiscally responsible progressive programs. In this political memoir, Hollings takes aim at our increasingly flawed political system and a government that has gone "into the ditch." As remedy he pulls antidotes from anecdotes about his personal experiences in making government work in spite of itself for the past half century. Hollings's long political career speaks volumes about the untapped potential of the elected and the electorate to use government for the good of all. Confrontational at times toward those issues and institutions he cites as responsible for knocking government off course, Hollings lays out clearly his deep commitment to improving our system of government, strengthening regulations on free trade, countering dependence on campaign contributions, and enhancing our communications and education programs to compete better in an information-driven global marketplace. This prescriptive compendium of sound thinking from an experienced agent of change serves as a call to action for those who would lead well and those who would be well led to reinvigorate a floundering system and call good people and good ideas back into the service of America's bright future.

Fifty years after their marriage, Jack and Michael's story is one of

the milestone events in the fight for equal rights, and this memoir the unmissable account a remarkable couple. On September 3, 1971, at the dawn of the modern gay movement, Michael McConnell and Jack Baker exchanged vows in the first legal same-sex wedding in the United States. But the battle to get there - legal and emotional - was only the start of their incredible lives together. Jack enrolled in law school, keeping his promise to Michael that he would figure out a way to marry. He did, but the repercussions would echo not only through their lives, but through those of every gay person in the US who ever wanted what this one pioneering couple did: a happy family life. This is the story of how they met, how they married, and what came after. And one wedding heard 'round the world. 'A beautiful, well-written love story that is heartrending and ultimately heartwarming' Robert Alexander, New York Times bestselling author of *The Kitchen Boy* 'A fascinating story of love and struggle that reads like a novel' Washington Book Review [The History of Medway, Mass., 1713-1885](#) Cartwheel Books "A great public service--critical for our time." --Bandy X. Lee, M.D., M.Div., Yale psychiatrist, expert on violence, and editor of *The Dangerous Case of Donald Trump* The New York Times bestselling author of *Bush on the Couch* shows that Donald Trump is mentally and emotionally unfit to execute the duties of President. No president in the history of the United States has inspired more alarm and confusion than Donald Trump. As questions and concerns about his decisions, behavior, and qualifications for office have multiplied, they point to one primary question: Does he pose a genuine threat to our country? The American Psychiatric Association's Goldwater Rule constrains psychiatrists from offering diagnoses on public figures who are not patients and who have not endorsed such statements. But in *Trump on the Couch* Clinical Professor of Psychiatry Justin A Frank invokes the moral responsibility that compels him to speak out and present a full portrait of a man who presents us with a clear and present danger. Using observations gained from a close study of Trump's patterns of thought, action, and communication, Dr. Frank uncovers a personality riddled with mental health issues. His analysis is filled with important revelations about our nation's leader, including disturbing insights into his childhood, his family, his business dealings, and his unusual relationship with alternative facts, including how the absence of a strong maternal force during childhood has led to Trump's remarkable lack of empathy and disregard for women's boundaries; His compulsion to polarize America has grown out of the way he perceives the world as full of deceitful and destructive persecutors; His inability to tolerate the pain of frustration has triggered his belief that omnipotence will finally remove it; His idiosyncratic use of language points to larger issues than even his tweets might suggest. With our country itself at stake, Dr. Frank calls attention to the underlying narcissism, misogyny, deception, and racism that drive the President who endangers it. A penetrating examination of how we as a nation got here and, more important, where we are going, *Trump on the Couch* sounds a call to action that we cannot ignore.
