This is Queen Liliuokalani's translation of the Hawaiian Creation chant, the Kumulipo. She translated this while under house arrest at Iolani Palace, and it was subsequently published in 1897. This is an extremely rare book which was republished (in a very scarce edition) by Pueo Press in 1978. The Kumulipo's composition is attributed to one of Liliuokalani's eighteenth century ancestors, Keaulumoku, just prior to European contact. It is a sophisticated epic which describes the origin of species in terms that Darwin would appreciate. The Kumulipo moves from the emergence of sea

creatures, to insects, land plants, animals, and eventually human beings. It describes a complicated web of interrelationships between various plants and animals. The most massive part of the chant is a genealogy which enumerates thousands of ancestors of the Hawaiian royal family. The Kumulipo is also available at this site in the 1951 translation of Martha Warren Beckwith, with comprehensive analysis and the complete Hawaiian text.

However Liliuokalani's version is of some historical significance. The last Queen of Hawaii, Liliuokalani was extremely literate, and steeped in Hawaiian tradition. She was the author of the well-known Hawaiian anthem, Aloha 'Oe as well as a Hawaiian history book, Hawaii'i's Story by Hawaii'i's Queen. *Sea People* p i kids

In the tradition of the smash hits Toy Story, A Bug's Life, Toy Story 2, Monsters, Inc., Finding Nemo, and The Incredibles comes the newest film from Pixar Animation Studios, Cars, the story of a race car who learns that it's not all about the fast lane. (In fact, life begins at the off-ramp.) Offering an insider's view into the artistic development of Cars, this gorgeously illustrated book celebrates the whimsical yet painstaking research that fueled Pixar's directors, production designers, and artists. Fascinating storyboards, full-color pastels, on-the-road snapshots, and hundreds of character sketches reveal the origins of Pixar's charming and clever automobile-based world. Gleaned from the team's trips to racetracks and down the famed Route 66, The Art of Cars is as colorful as its memorable story and characters, making this book—the only movie tie-in for adults—a spirited ride down the road of a masterful animated feature film. Cars is a Walt Disney Pictures presentation of a Pixar Animation Studios film. 2006 by Disney Enterprises, Inc./Pixar Animation Studios. All rights reserved.

The Threshold of the Pacific Ladybird Books

Disturbing History focuses on Fiji's people and their agency in responding to and engaging the multifarious forms of authority and power that were manifest in the colony from 1874 to 1914. By concentrating on the lives of ordinary Fijians, the book presents alternate ways of reconstructing the island's past. Couched in the traditions of social, subaltern, and people's histories, the study is an excavation of a large mass of material that tells the often moving stories of lives that have largely been overlooked by historians. These challenge conventional historical accounts that tend to celebrate the nation, represent Fiji's colonial experience as ordered and peaceful, or British tutelage as benevolent. In its contribution to postcolonial theory, Disturbing History reveals resistance as a constant but partial and untidy mix of other constituents such as collaboration, consent, appropriation, and opportunism, which together form the colonial landscape. In turn, colonialism in Fiji is shown as a force shaped in struggle, fractured and often fragile, with a presence and application in the daily lives of people that was often chaotic, imperfect, and susceptible to subversion. The book divides the period of study into two broad categories: organized resistance and everyday forms of resistance. The first examines the Colo War (1876), the Tuka Movement (1878-1891), the Seaqaqa War (1894), the Movement for Federation with New Zealand (1901-1903), the Viti Kabani Movement (1913-1917), and the various organized labor protests. The second half of the book addresses resistance manifested in the villages and plantations, including tax and land boycotts, violence and retributive justice, avoidance protest, petitioning, and women's resistance. In their entirety these forms reveal a complex web of relationships between powerful and subordinate groups and among subordinate groups themselves. The author concludes that resistance cannot be framed as a totality but as a multilayered and multidimensional reality. In the wake of Fiji's present volatile climate, this book will aid readers in understanding the continuities and disjunctures in Fiji's interethnic and intraethnic relations.

The world we live in is fast paced, cutthroat, and incredibly confusing. We are often forced to make choices we truly aren't sure about, or weren't ready to make. We spend our time saying "What if?" or "I shouldn't have." We often look out instead of in as we try to find the root of what makes us tick, placing blame on everyone and everything other than ourselves along the way. Pete Evick, professional musician, award-winning producer, songwriter, and father, shares his personal stories about the unique moments in his life, in hopes that they will convince you, the readers, to dig a little deeper into your own moments and evoke the mental archaeologist lying dormant in all of us.

A blend of Jared Diamond's Guns, Germs, and Steel and Simon Winchester's Pacific, a thrilling intellectual detective story that looks deep into the past to uncover who first settled the islands of the remote Pacific, where they came from, how they got there, and how we know. For more than a millennium, Polynesians have occupied the remotest islands in the Pacific Ocean, a vast triangle stretching from Hawaii to New Zealand to Easter Island. Until the arrival of European explorers they were the only people to have ever lived there. Both the most closely related and the most widely

dispersed people in the world before the era of mass migration, Polynesians can trace their roots to a group of epic voyagers who ventured out into the unknown in one of the greatest adventures in human history. How did the earliest Polynesians find and colonize these far-flung islands? How did a people without writing or metal tools conquer the largest ocean in the world? This conundrum, which came to be known as the Problem of Polynesian Origins, emerged in the eighteenth century as one of the great geographical mysteries of mankind. For Christina Thompson, this mystery is personal: her Maori husband and their sons descend directly from these ancient navigators. In Sea People, Thompson explores the fascinating story of these ancestors, as well as those of the many sailors, linguists, archaeologists, folklorists, biologists, and geographers who have puzzled over this history for three hundred years. A masterful mix of history, geography, anthropology, and the science of navigation, Sea People combines the thrill of exploration with the drama of discovery in a vivid tour of one of the most captivating regions in the world. Sea People includes an 8-page photo insert, illustrations throughout, and 2 endpaper maps.

Animation has been a staple of the filmmaking process since the early days of cinema. Animated shorts had been produced for decades, but not until 1937 did a major studio venture into animated features when Walt Disney produced Snow White and the Seven Dwarfs. Of the hundreds of animated feature films made since, many have proven their importance over the years while also entertaining generations of audiences. There are also many recent animated movies that promise to become classics in the field. In 100 Greatest American British Animated Films, Thomas S. Hischak looks at the most innovative, influential, and entertaining features that have been produced since the late 1930s—from traditional hand-drawn works and stop-motion films to computer-generated wonders. These movies have been selected not simply because of their popularity or critical acceptance but for their importance. Entries in this volume contain plot information production history critical reaction commentary on the film's cinematic quality a discussion of the film's influence voice casts production credits songs sequels, spin-offs, Broadway versions, and television adaptations awards and nominations Each movie is also discussed in the context of its original release as well as the ways in which the film has lived on in the years since. Familiar favorites and lesser-known gems are included, making the book a fascinating journey for both the avid animation fan and the everyday moviegoer. With a sweeping look at more than eight decades of movies, 100 Greatest American and British Animated Films highlights some of the most treasured features of all time.

Since the 1930s, the Walt Disney Company has produced characters, images, and stories that have captivated audiences around the world. How can we understand the appeal of Disney products? What is it about the Disney phenomenon that attracts so many children, as well as adults? In this updated second edition, with new examples provided throughout, Janet Wasko examines the processes by which the Disney company - one of the largest media and entertainment corporations in the world - continues to manufacture the fantasies that enthrall millions. She analyses the historical expansion of the Disney empire into the twenty-first century, examines the content of Disney's classic and more recent films, cartoons and TV programs and discusses how they are produced, considering how some of the same techniques have been applied to the Disney theme parks. She also discusses the reception (and sometimes, reinterpretation) of Disney products by different kinds of audiences. By looking at the Disney phenomenon from a variety of perspectives, she provides an updated and comprehensive overview of one of the most significant media and cultural institutions of our time. This important book by a leading scholar of the entertainment industries will be of great interest to students in media and cultural studies, as well as a broader readership of Disney fans.

"Aphrodite's Island is a bold new account of the European discovery of Tahiti, the Pacific island of mythic status that has figured so powerfully in European imaginings about sexuality, the exotic, and the nobility or bestiality of 'savages'. In this ground-breaking book, Anne Salmond takes readers to the centre of the shared history to furnish rich insights into Tahitian perceptions of the visitors while illuminating the full extent of European

fascination with Tahiti. As she discerns the impact and meaning of the European effect on the islands, she demonstrates how, during the early contact period, the mythologies of Europe and Tahiti intersected and became entwined. Drawing on Tahitian oral histories, European manuscripts and artworks, collections of Tahitian artefacts, and illustrated with contemporary sketches, paintings, and engravings from the voyages, Aphrodite's Island provides a vivid account of the Europeans' Tahitian adventures. At the same time, the book's compelling insights into Tahitian life significantly change the way we view the history of this small island during a period when it became a crossroads for Europe."

The contributors to Media Crossroads examine space and place in media as they intersect with sexuality, race, ethnicity, age, class, and ability. Considering a wide range of film, television, video games, and other media, they show how spaces--from the large and fantastical to the intimate and virtual--are shaped by the social interactions and intersections staged within them. The highly teachable essays include analyses of media representations of urban life and gentrification, the ways video games allow users to adopt an experiential understanding of space, the intersection of the regulation of bodies and spaces, and how style and aesthetics can influence intersectional thinking. Whether interrogating the construction of Portland as a white utopia in Portlandia or the link between queerness and the spatial design and gaming mechanics in the Legend of Zelda videogame series, the contributors deepen understanding of screen cultures in ways that redefine conversations around space studies in film and media.
