 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range

from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and

automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always

printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose

influence in the theory of L systems has been most significant.

Evan-Moor Corporation Drowning in \$20,000 of credit card debt, shopaholic Karyn Bosnak asked strangers for money online -- and it worked! What would you do if you owed \$20,000? Would you: A) not tell your parents? B) start your own website that asked for money without apology? or C) stop coloring your hair, getting pedicures, and buying Gucci? If you were Karyn

Bosnak, you'd do all three. Karyn started a funny yet honest website, www.savekaryn.com, on which she asked for donations to help her get out of debt. Karyn received e-mails from people all over the world, either confessing their own debt-ridden lives, or criticizing hers. But after four months of Internet panhandling and selling her prized possessions on eBay, her debt was gone! In *Save Karyn: One Shopaholic's Journey to Debt and Back*, Karyn details the bumpy road

her financial -- and personal -- life has traveled to get her where she is today: happy, grateful, and completely debt-free. In this charming cautionary tale, Karyn chronicles her glamorous rise, her embarrassing fall, and how the kindness of strangers in cyberia really can make a difference. OGT Reading America's Test Kitchen Seventeen year old, Tianna Harper, never expected to leave Georgia. But after her mother lands a new job

overseas, she is forced to leave her small rural town and move up North with her crazy, no-holds-barred, aunt in Brooklyn. Fast paced. Full of life. New York is nothing like back home. And with the help of her cousin, Lavina, Tianna learns to adjust to the new way of life in the busy city. However, everything as she knows it changes, when she meets Damien, a smooth talking, baby faced brother from around the way, who manages to turn her life completely upside down. A coming of age

story, compellingly painted with the rich essence of 1970's through early 90's New York, Brown Silk shares the gripping tale of a young girl's journey to womanhood, as she discovers the poignant beauty of love, pain, and self-acceptance.

 Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a

rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to

Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

This is the ninth in the 300 series of circuit design books, again contains a wide range of

circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal

with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi. It's rare to discover a candid sports autobiography-- even rare when the author is one of the most recognizable athletes in the world. But in *Shaq Talks Back*, Shaquille O'Neal for the first time talks frankly about his childhood, his life, his rivalries, and his career, culminating in a dramatic, behind-the-scenes account of the Los Angeles Lakers' drive to the NBA Championship. At seven feet one inch tall and 330 pounds, Shaq has always faced outsized

expectations, even as a child when he towered over other kids. Shaq Talks Back is the story of how potential became reality-- how someone expected to be a champion finally learned to become one. Beginning with his memory of crying on the court after the Lakers defeated the Indiana Pacers, Shaq takes us back to his younger days in Newark and Jersey City, New Jersey, then to Georgia and finally to Germany, where he began to harness some of his

height and strength. From there, he recounts the remarkable progress of his basketball career, changing from a big but inexperienced teenager to a dominant college and professional player. Shaq talks about: * Playing at Louisiana State University for the unpredictable coach Dale Brown * Signing the biggest rookie contract ever with the Orlando Magic-- and going to the NBA Finals for the first time * What happened next: dissention, disappointment, and his

decision to leave for Los Angeles * The dysfunctional Lakers who were never able to win the big games * Dealing with egos as he finds the right chemistry with Kobe Bryant, Phil Jackson, and new additions to the team * Rivalries with Alonzo Mourning, Patrick Ewing, Hakeem Olajuwon, David Robinson, and others * The trouble with free throws... * "Bling-bling" and women: the larger-than-life world of NBA players off the court * Inside the Lakers' comeback from the brink

against Portland and the drive to the NBA championship Funny, insightful, opinionated, and unexpectedly moving, Shaq Talks Back is the true voice of the NBA's best player.

One of the key tenets of the Zen school of Mahayana Buddhism is that each one of us is already a Buddha—our enlightenment is inherent within us, and the practice of mindfulness is the tool to bring this truth to our full awareness. While it can bring much relief, this simple statement does not preclude the need for practice. We must strive to always be aware of our

Buddha nature, rather than waiting until times of emotional upheaval when it is more difficult to practice. Thich Nhat Hanh uses the teachings of ninth century Zen Master Linji to elaborate on this simple truth and to give readers tools that can help awaken them to their true inner nature. Linji's recorded teachings are the most significant we have from the Ch'an school. One of the unique aspects of Linji's teaching, is the need to "wake ourselves up," not only by means of sitting

meditation and listening to enlightened teachings, but also through unique techniques such as the shout, the stick, and the empty fist. Master Linji emphasized direct experience of our true nature over intellectual explorations of the teachings, and he encouraged his students to not "become lost in the knowledge or the concepts of the teaching." Powerful, direct, and uncompromising, Thich Nhat Hanh's reflections on the teachings of Master Linji are destined to

become classic Buddhist writings.
