Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: *Every chapter has been updated and includes a number of new lesson ideas. *The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. *Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. *Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Average Americans Were the True Framers of the Constitution Woody Holton upends what we think we know of the Constitution's origins by telling the history of the average Americans who challenged the framers of the Constitution and forced on them the revisions that produced the document we now venerate. The framers who gathered in Philadelphia in 1787 were determined to reverse America's post-Revolutionary War slide into democracy. They believed too many middling Americans exercised too much influence over state and national policies. That the framers were only

partially successful in curtailing citizen rights is due to the reaction, sometimes violent, of unruly average Americans. If not to protect civil liberties and the freedom of the people, what motivated the framers? In *Unruly Americans and the Origins of the Constitution*, Holton provides the startling discovery that the primary purpose of the Constitution was, simply put, to make America more attractive to investment. And the linchpin to that endeavor was taking power away from the states and ultimately away from the people. In an eye-opening interpretation of the Constitution, Holton captures how the same class of Americans that produced Shays's Rebellion in Massachusetts (and rebellions in damn near every other state) produced the Constitution we now revere. *Unruly Americans and the Origins of the Constitution* is a 2007 National Book Award Finalist for Nonfiction. Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.
